SUMMARY

I am a passionate frontend developer dedicated to crafting exceptional web experiences that blend creativity with technical expertise. Proficient in HTML, CSS, JavaScript, and TypeScript, I excel at problem-solving and transforming ideas into reality. I thrive in collaborative environments, ensuring projects are delivered on time with the highest quality. My focus is on designing interactive and visually appealing interfaces that leave a lasting impression on users.

TECHNICAL SKILLS

• Programming languages: PHP, JavaScript, TypeScript , C++, C#
• Frameworks: React
• Databases: Microsoft SQL Server, MYSQL , supabase
• More: Algorithm, Data Structures, Design Patterns, OOP, Git, Problem-Solving

INTERNSHIPS AND TRAININGS

Damietta university   **July 2021 -Aug 2021**
Computer Science Intern

- Created visually appealing interfaces for software applications.
- Made specialized contributions to projects leveraging computer science fundamentals.
- Enhanced team efficiency through effective collaboration and problem-solving.

Alexandria university   **Aug 2021 -Sep 2021**
HackerRank Campus Club, AUFS

- Developed proficiency in front-end technologies (HTML, CSS, JavaScript, React).
- Applied knowledge of programming languages, algorithms, and data structures to projects.
- Contributed to team projects, demonstrating strong technical and collaborative skills.

LANGUAGES

• Arabic (Mother Tongue)
• English (Very Good)

EDUCATION

Bachelor of Science - Damietta University   **Sep 2019 – June 2022**
Major: Computer Science
GPA : 3.16

Graduation Project :
Led the development of "Gate of Research," a comprehensive research library website. This project utilized a Laravel API for data management and a React frontend for a dynamic and intuitive user experience.
Key features included search functionality, user authentication and crud operation. (Github)
